Welcome to Econ 135. We are very happy to have you here. We hope to help you obtain a first-class educational experience this fall.

This class is open to all undergraduate and graduate students at UC Berkeley, enrollment limits permitting. Econ 1 or equivalent is a required prerequisite (with exceptions made with the permission of the instructor).

This course examines the idea & the reality of economic growth in historical perspective, beginning with the invention of agriculture & continuing through with forecasts for the 21st century and beyond. Topics covered include, among others:

human language & sociability; the discovery of agriculture & the domestication of animals; the origins & maintenance of gross inequality; Malthusian economies; the commercial & industrial revolutions; modern economic growth; international prosperity differentials; OECD convergence & East Asian growth miracles; the political economy of growth & stagnation; & the stubborn persistence of poverty.

Acknowledgement: This course is borrowed & revised from one taught at Harvard by Melissa Dell: Econ 1342. It was her idea to teach a course like this, & her work that broke the ground, & made this course excellent wherever it is excellent.

Notes After 2020-01-21 0. Introduction:

For Lecture 2: 1.1. Theory: Robert Solow's Growth Model <https://bcourses.berkeley.edu/courses/1487685/discussion_topics/5660546>, I have moved the "Lecture Notes: Solow Growth Model" reading (parts 1-5) and the second half of Dasgupta to the weekend: I would like people who haven't read Aristotle, Dasgupta (first half), Clark, and Pritchett to catch up first...

Further reading: If you are curious—and have the time—it is worthwhile reading *The Man Who Saw the Deep* (Gilgamesh). It is the oldest significant story that has come down to us, and it is worthy of ancestral respect: <<https://www.bradford-delong.com/2020/01/anonymous-the-man-who-saw-the-deep-gilgamesh-surpassing-all-kings-powerful-and-tall-beyond-all-others-violent.html>>. Also worth reading for the truly ancient—i.e., pre-written history—history of humanity and its material culture is: **David W. Anthony** (2007): *The Horse, the Wheel, and Language: How Bronze-Age Riders from the Eurasian Steppes Shaped the Modern World* <<https://delong.typepad.com/files/anthony-horse.pdf>>. But I would much rather you spend your reading time on Aristotle, Dasgupta, Clark, and Pritchett...
